

Canine Senior Questionnaire

Pets age much faster than people do. Most pets are considered seniors at 7 years of age. One month in a dog's life is about 6 months in people and big changes can occur in our beloved older pets over a 6 month period, let alone a full year after they turn 7 years old. We recommend that your senior pet comes in twice a year for a routine physical exam, so that we can offer you and your pet the best care possible.

Please answer the questionnaire below to the best of your knowledge.

Circle or check the correct response.

- 1.) My dog spends most of their time:
 - Indoors
 - Outdoors
 - In and out
 - 2.) Which best describes your dog's weight?
 - No change in weight
 - Lost weight
